Your 7-Day Launch Plan

From workshop to live business in one week. Stick this on your desk. Check off each day.

Monday — Polish

DAY 1

Start the week strong by tightening everything up before you go public. Today is about making sure your foundation is solid.

Refine Your Website

Incorporate feedback from today's review session. Fix copy, layout issues, and any broken links.

Update Chatbot Knowledge Base

Add anything you missed. Make sure your AI can answer every common question a new customer might ask.

Fix End-to-End Issues

Run through the full customer journey and patch any gaps you find before the week progresses.

⏱️ **Time needed: 2–3 hours**

Tuesday — Price & Pay

DAY 2

Money doesn't move without a clear pricing structure and a frictionless payment flow. Today you build both.

Basic

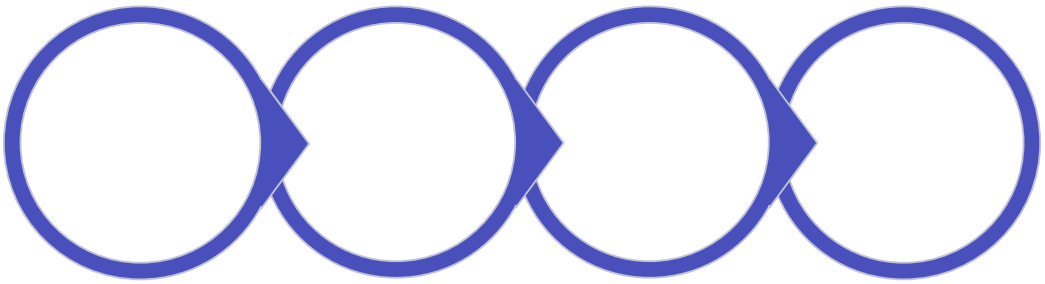
Your entry-level tier. Define what's included and set a competitive price point that lowers the barrier to entry.

Standard

Your most popular option. This is where most customers should land. Price it to feel like the obvious choice.

Premium

Your high-value tier. Include everything plus white-glove service or advanced features for serious buyers.



ⓘ ⏱️ **Time needed: 1–2 hours**

Wednesday — Publish

DAY 3

Your digital presence goes live today. Show up where your customers are and make sure your professional identity reflects your new venture.

First 5 Social Posts

Publish your first 5 posts from the 30-day content calendar. Consistency starts now — momentum builds from day one.

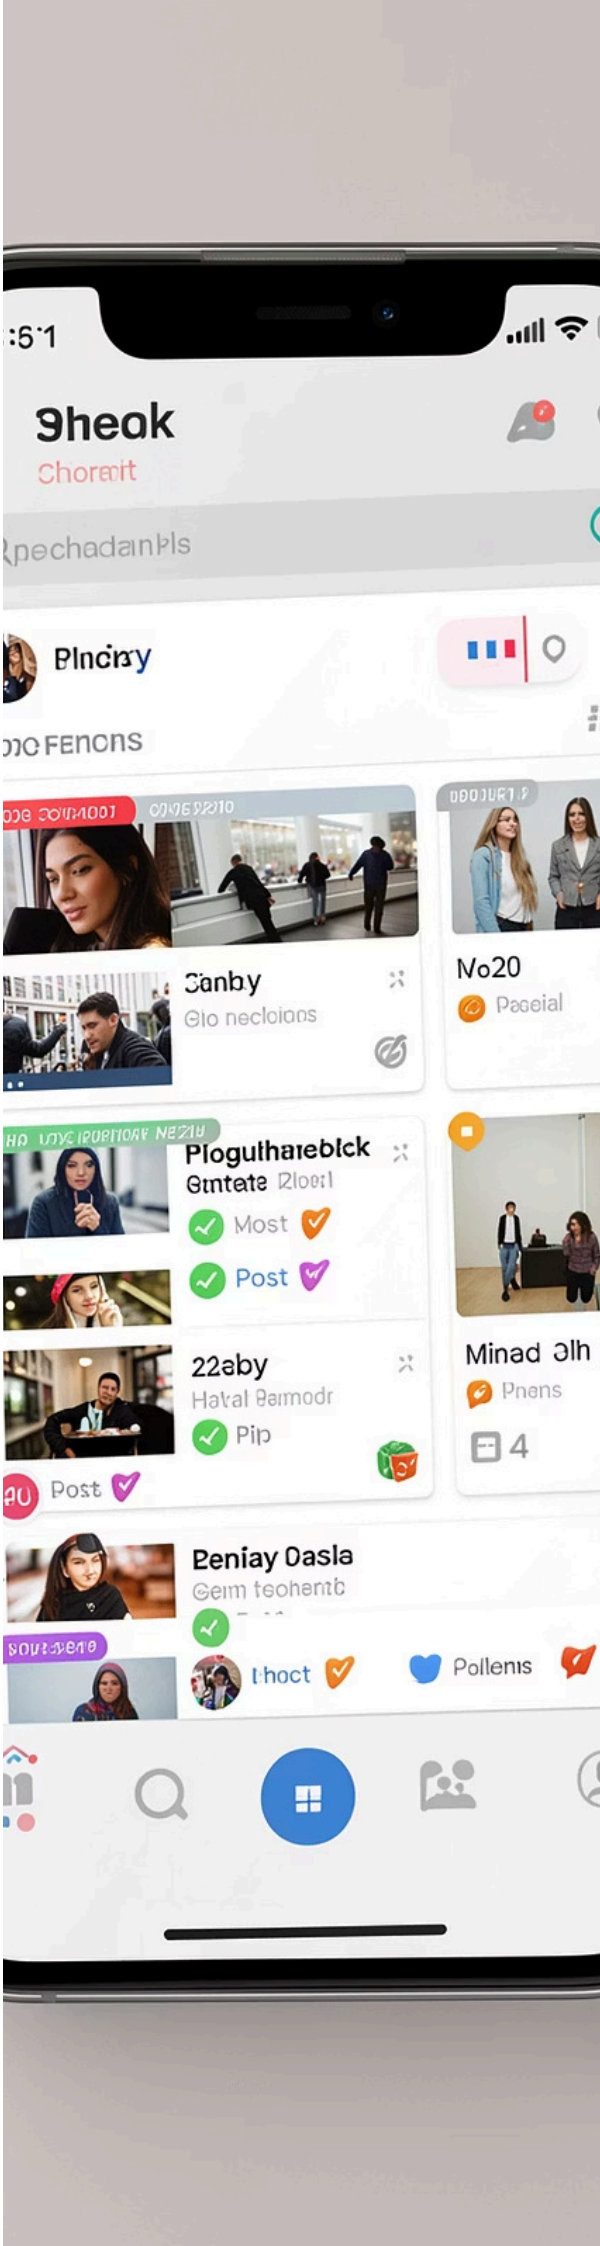
Google Business Profile

Set up your Google Business Profile if applicable. This makes you discoverable to local customers searching for your services.

LinkedIn Update

Update your headline and bio to reflect your new venture. Your network is your first audience — make sure they know what you're building.

⏱️ **Time needed: 1–2 hours**



Thursday — Campaign

DAY 4

Your first real outreach. Warm contacts are your fastest path to early customers — and your AI handles every reply so you can focus on strategy.

Your Launch Campaign Targets

1 Friends & Family

Your most supportive audience. They'll share, refer, and give honest feedback.

2 Ex-Colleagues

Professional contacts who already trust your expertise and know your work ethic.

3 Relevant Groups

Communities where your ideal customer already hangs out. High-leverage reach.

50

Contacts to reach

Send your WhatsApp launch campaign to 50 warm contacts today.

1hr

Time to send

Then let the AI handle every reply while you monitor and refine.

🤖 **Let the AI handle every reply.** Monitor conversations throughout the day and refine responses as needed.

Friday — Outreach

DAY 5

Time to go beyond your warm network. Your AI voice agent dials prospects while you focus on reviewing results and following up with interested leads.

1

Activate Voice Agent

Turn on your outbound lead gen voice agent. Configure targeting for local businesses and relevant contacts.

2

Target 20 Prospects

Local businesses, potential clients, and relevant contacts. The AI runs the calls — you just set the list.

3

Review & Follow Up

Check call summaries after the AI completes outreach. Personally follow up with every interested lead.

📞 **1 hour setup** — then the AI runs the calls autonomously throughout the day.

🎯 **Target: 20 prospects** — local businesses, potential clients, and relevant contacts in your niche.

Saturday — Test

DAY 6

Before you go fully live, stress-test the entire customer journey with real people. Find the gaps now so Sunday's launch is flawless.

01

Visit Website

Ask 3 friends to land on your site cold. Do they immediately understand what you offer?

02

Chat with Bot

Have them ask real questions. Does the chatbot respond accurately and helpfully?

03

Call Voice Agent

They call in as a prospect. Does the voice agent handle the conversation naturally?

04

Check Payment

Walk through the payment flow. Is it smooth, branded, and trustworthy?

05

Test Support

Raise a support issue. Does the system respond quickly and resolve it correctly?

⚠️ 📋 **Collect all feedback and fix every gap before Sunday.** This is your last chance to polish before the real launch.

ⓘ ⏱️ **Time needed: 3–4 hours**

Sunday — LAUNCH 🚀

DAY 7

This is the day everything you've built goes live. You are no longer preparing — you are open for business.

Write Your LinkedIn Post

Announce your venture using the provided template. Tell your story, share your mission, and invite your network in.

Share Your Website URL

Post your URL publicly across all channels. Your digital storefront is open — send traffic to it.

Start Accepting Customers

You are now live. Real customers, real payments, real business. Your AI workforce is running 24/7.

> **You are now live. Your AI workforce is running 24/7.**

Your 7-Day Journey at a Glance

Every day had a purpose. Every action built toward this moment. Here's the full week in one view.

1 **Mon**

Polish — Website, chatbot & end-to-end fixes

2 **Tue**

Price & Pay — Tiers, UPI links & invoices

3 **Wed**

Publish — Social posts, Google & LinkedIn

4 **Thu**

Campaign — WhatsApp to 50 warm contacts

5 **Fri**

Outreach — Voice agent targets 20 prospects

6 **Sat**

Test — Full end-to-end with 3 friends

7 **Sun**

Launch — Go live & start accepting customers

7

Days to launch

From workshop to live business in one focused week.

50

WhatsApp contacts

Warm outreach campaign on Thursday.

20

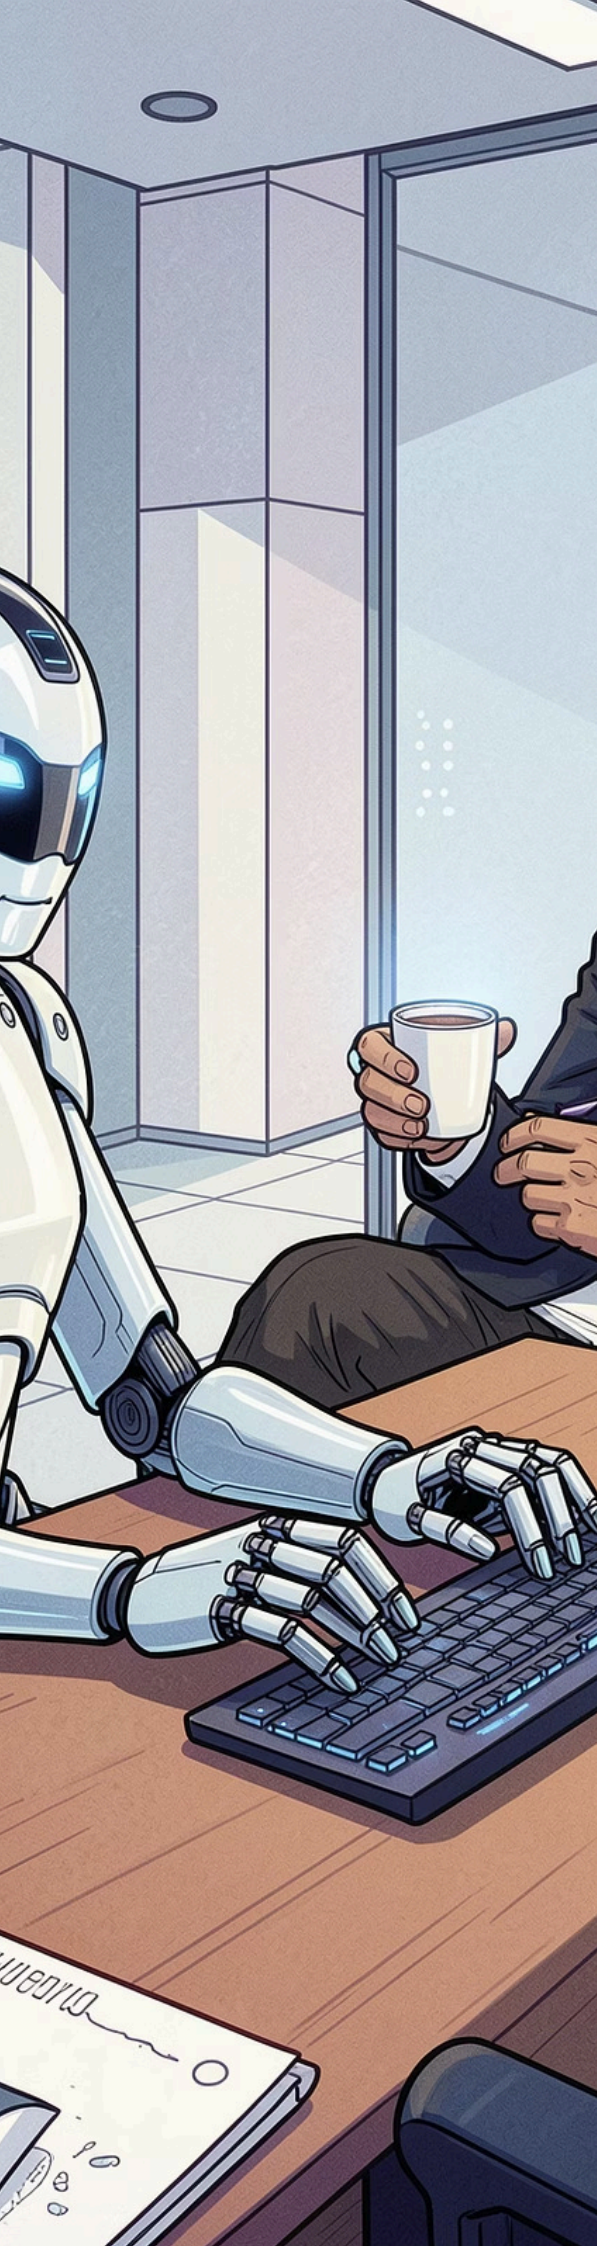
Prospects called

AI voice agent outreach on Friday.

3

Pricing tiers

Basic, Standard, and Premium — ready to sell.



Remember: Your AI Workforce Never Sleeps

You didn't just launch a business. You built a team that works around the clock — so you can focus on what only you can do.

🤖 Chatbot

Answers customer questions **while you sleep.** No missed inquiries, no delayed responses — just instant, accurate help at any hour.

📞 Voice Agent

Takes calls and qualifies leads **while you're in meetings.** Every prospect gets a professional response, every time.

💬 WhatsApp Bot

Nurtures leads and follows up **while you focus on strategy.** Your pipeline keeps moving without you lifting a finger.

> **You built a business with an AI workforce. Now let it work.**
