Ground Rules

No Stupid Questions

Most of you have built more businesses than I have. I'm showing you new tools — you bring the business judgment.

Laptops Open / Closed

Laptops open during exercises. Closed during demos. Full attention in both directions.

Help Your Neighbor

If someone next to you is stuck, be generous. A rising tide lifts all ships.

It's All Yours

Everything you build today belongs to you. This is not homework — it's a real business.

Let's Begin.

Module 1 — Find Your Idea

Open your workbook to the first exercise sheet. Your goal: find an idea you're genuinely excited about and validate it with AI — in 20 minutes.

The best venture you'll ever build starts with a problem you personally understand. Start there.

What You'll Walk Out With Today

A complete, operating business — built by you, owned by you, powered by AI.

7

Modules

Each one adds a new layer to your venture.

5

Hours

From blank canvas to functioning business.

3

AI Platforms

osmAgent, osmTalk, and osmAPI — your permanent toolkit.

1

Venture

Validated, branded, live, and ready to generate revenue.

Reminder: The 7-Day Launch Plan in your workbook maps exactly what to do after today to get your first paying customer.
