NAMING PRINCIPLES

What Makes a Great Business Name?

Memorable

Easy to recall after hearing just once

Pronounceable

Works in English, Hindi, and your regional language

Domain-Available

Check .com and .in immediately after shortlisting

Short & Evocative

2–3 syllables; hints at what you do or how you make people feel

Brand Voice — The Most Underrated Asset

Your brand voice is how customers instantly decide: *professional or casual? Premium or accessible? Innovative or traditional?* Get this right and everything else feels coherent.

3 Personality Words

e.g., *"Warm, fresh, dependable"* — the filter for every piece of communication

Tone Guidelines

How you write emails, social posts, and even handle complaints

Always vs. Never

Explicit rules: what you always say, and what you never say

ⓘ Consistency across every touchpoint — website, chatbot, voice agent — is what builds trust over time.
