Module 3: Your Digital Storefront

Live in 20 Minutes — Build and deploy a complete, conversion-ready website from scratch

11:45 – 12:30 | 45-MINUTE SESSION | MODULE 3 OF 5

Session Roadmap

What We'll Cover Today

01

Instruction (15 min)

Why your website matters, anatomy of a converting site, SEO basics, and mobile-first design

02

Live Demo (5 min)

Instructor builds a complete website live in osmAgent using a real participant brand

03

Hands-On Exercise (20 min)

You build, refine, add SEO, and deploy your own live website — with a real URL

04

Evaluation (10 min)

Peer review against a structured rubric — 5 dimensions, scored out of 25

Your Website Works While You Sleep

Every channel — social media, WhatsApp, voice calls — eventually sends customers **somewhere**. Without a website, you have a brand but no home. With one, you have a **24/7 conversion machine**.

Traditional Route

Web developer: Rs. 50K–5 Lakhs
Design agency: 2–4 weeks

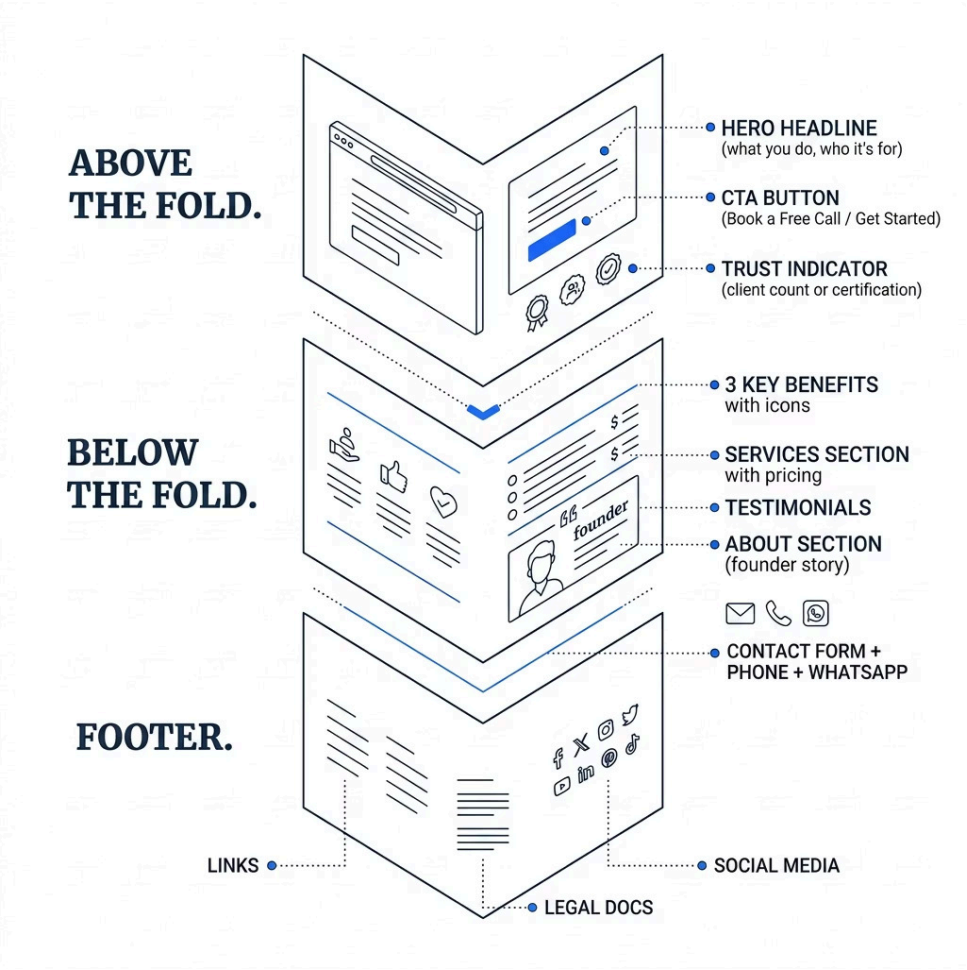
osmAgent

Full website: **10 minutes**
Zero coding. Zero agency fees.

Website Architecture

Anatomy of a Website That Converts

The first **5 seconds** decide whether a visitor stays or leaves. Every element must earn its place.



The Golden Rule
Every single page must end with a CTA. No dead ends — every visitor should always have a clear next step.

Above the Fold

- Hero headline — one sentence: what you do, who it's for
- CTA button: "Book a Free Call" or "Get Started"
- Trust indicator: client count or certification

Below the Fold

- 3 key benefits with icons
- Services with pricing, testimonials, founder story
- Contact form + phone + WhatsApp

Live Demo — Built in Real Time

The instructor builds a **complete website live** using one participant's brand from Module 2. Watch the full process from blank page to live URL — on screen and on phone.

🏠 Homepage

Hero section, CTA, trust indicators, benefits

💼 Services

Full services page with live pricing displayed

👤 About

Founder story page — personal and credible

⭐ Testimonials

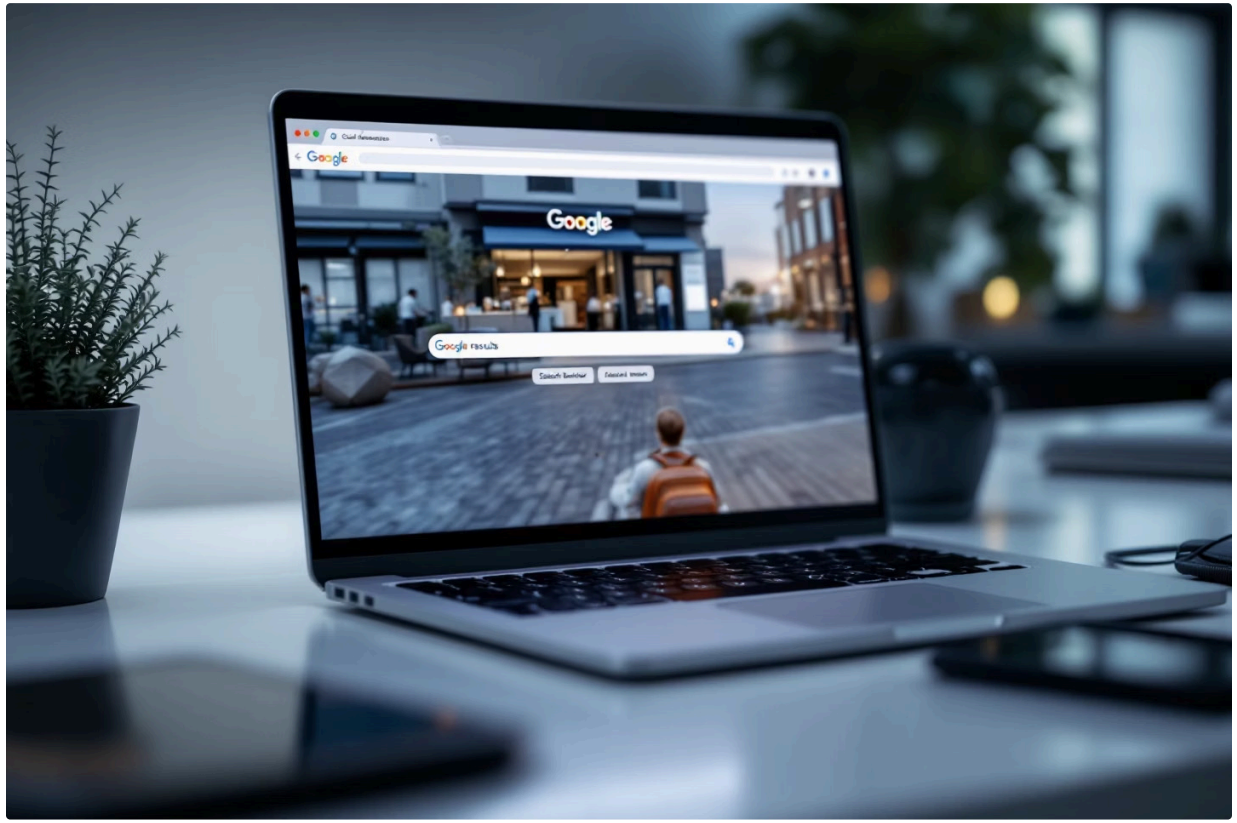
Social proof section with real client quotes

📞 Contact

Form, phone number, and WhatsApp link

🌐 Deployed

Live URL — working in browser and on phone



Getting Found on Google

SEO Basics — Built In

Basic SEO puts you ahead of **80% of new businesses** that ignore it entirely. osmAgent handles it automatically.

- Meta titles and descriptions for every page
- Target keywords matched to your industry
- Blog posts that attract organic traffic
- Google Business Profile optimization suggestions

You don't need to be an SEO expert. osmAgent generates everything — you just review and publish.

Design Priority

Mobile First — Always

75%+

Indian internet users

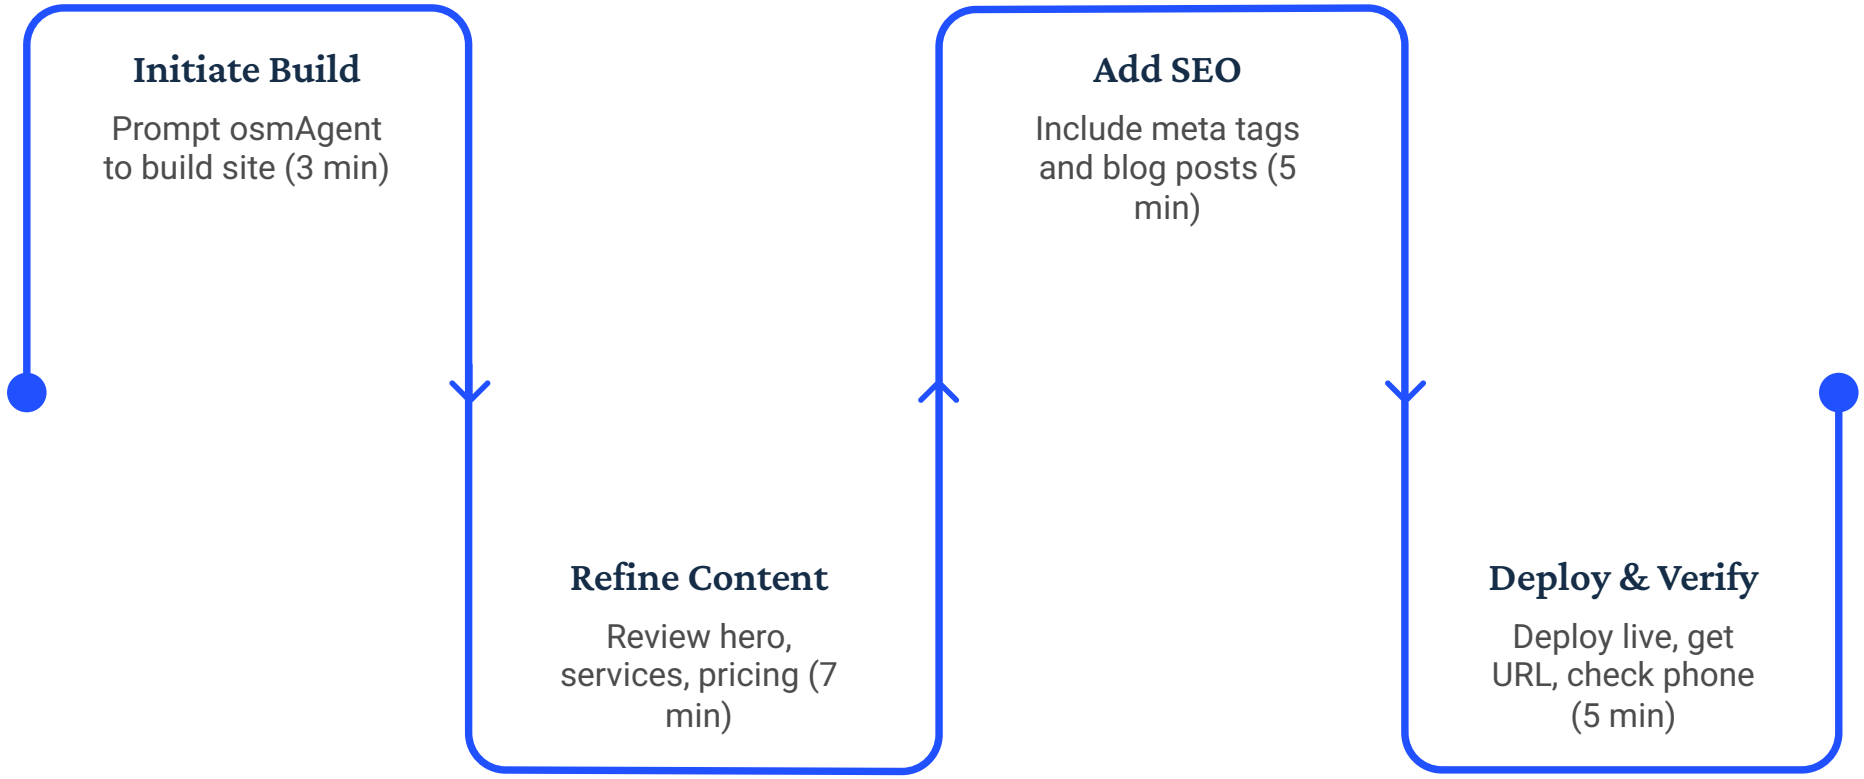
browse exclusively on mobile devices

Your website **must** look flawless on a phone screen. osmAgent generates fully responsive designs by default — no extra steps required.

⚠ During the exercise, open your live site on your phone immediately. If it doesn't look right on mobile, it doesn't work.

Hands-On Exercise — 20 Minutes

Build Your Website Now



Follow all four steps in sequence. Each builds on the previous — don't skip ahead. Your deployed URL is the final deliverable.

Step-by-Step Prompt Guide

What to Type in osmAgent

Step 1 — Build the Site

"Build a professional website for [brand name]. Include: homepage with hero section and CTA, services page with [your 5 services from Module 1] and pricing, about page with founder story, testimonials section, contact page with form. Use brand colors from Module 2. Make it conversion-focused."

Step 2 — Refine

Update hero headline. Adjust service descriptions. Add real pricing. Customize contact details with your phone and WhatsApp number.

Step 3 — Add SEO + Blog

"Add SEO meta tags for all pages, a blog section with 3 starter posts about [industry], and Google Business Profile suggestions."

Step 4 — Go Live

Deploy. Copy your live URL. Open on phone. Share the link with your neighbor and get their first-impression feedback.

Before You Submit

Deliverable Checklist

Confirm every item is live on your deployed URL before the evaluation begins.

Website Pages

- [ ] Homepage with hero section and CTA
- [ ] Services page with pricing
- [ ] About page with founder story
- [ ] Testimonials section
- [ ] Contact form (with phone + WhatsApp)

Technical Requirements

- [ ] Blog with 3 starter posts
- [ ] SEO meta tags on all pages
- [ ] Live URL (deployed and accessible)
- [ ] Mobile verified — opened on phone

Peer Evaluation

Scoring Rubric — Rate 1 to 5

Evaluate your neighbor's site on all five dimensions. Total score: **/25 points**.

#	Dimension	What to Look For
1	Clear value proposition above the fold	Can you tell what they do in under 5 seconds?
2	Professional design and brand consistency	Colors, fonts, and tone match the brand identity
3	Services and pricing clearly presented	No guessing — offerings and costs are explicit
4	Strong CTA placement on every page	Every page ends with a clear next action
5	Mobile-responsive and fast	Looks great on phone, loads without delay

You're Now Live on the Internet

Your website is not a mockup. It's a real URL that **anyone in the world can visit right now**. Share it — it works.

What You Built

A full, SEO-ready, mobile-responsive website — in under 20 minutes

What's Next

Module 4 — Add an AI chatbot to your site so it answers customer questions 24/7
