
Module 5: Your AI Receptionist

Never Miss a Customer — Not Even at 3:47 AM

12:30 – 1:00 PM | DEMO: 10 MIN | YOU BUILD: 15 MIN | REVIEW: 5 MIN

The 3:47 AM Problem

A potential customer visits your website in the dead of night and types: **"Do you deliver to Kondapur?"** What happens next defines whether you win or lose that sale — permanently.

❌ Without osmTalk

No reply until 9 AM. By then, the customer has booked with your competitor who replied *instantly*. You lost **Rs. 1,500** in revenue you will never even know about.

✅ With osmTalk

Instant reply: *"Yes! We deliver to Kondapur. Would you like to see our meal plans?"* Customer browses. Books. Pays. You are sleeping. Your chatbot is selling.

The Numbers Don't Lie

After-hours inquiries are not rare exceptions — they are a daily revenue leak hiding in plain sight. Every unanswered message is a competitor's win.

40%

After-Hours Inquiries

Nearly half of all customer inquiries arrive outside business hours — when no human is available to respond.

₹75

Cost Per Missed Lead

Average revenue lost per unanswered inquiry in a service business. It adds up fast — every single day.

100%

Chatbot Capture Rate

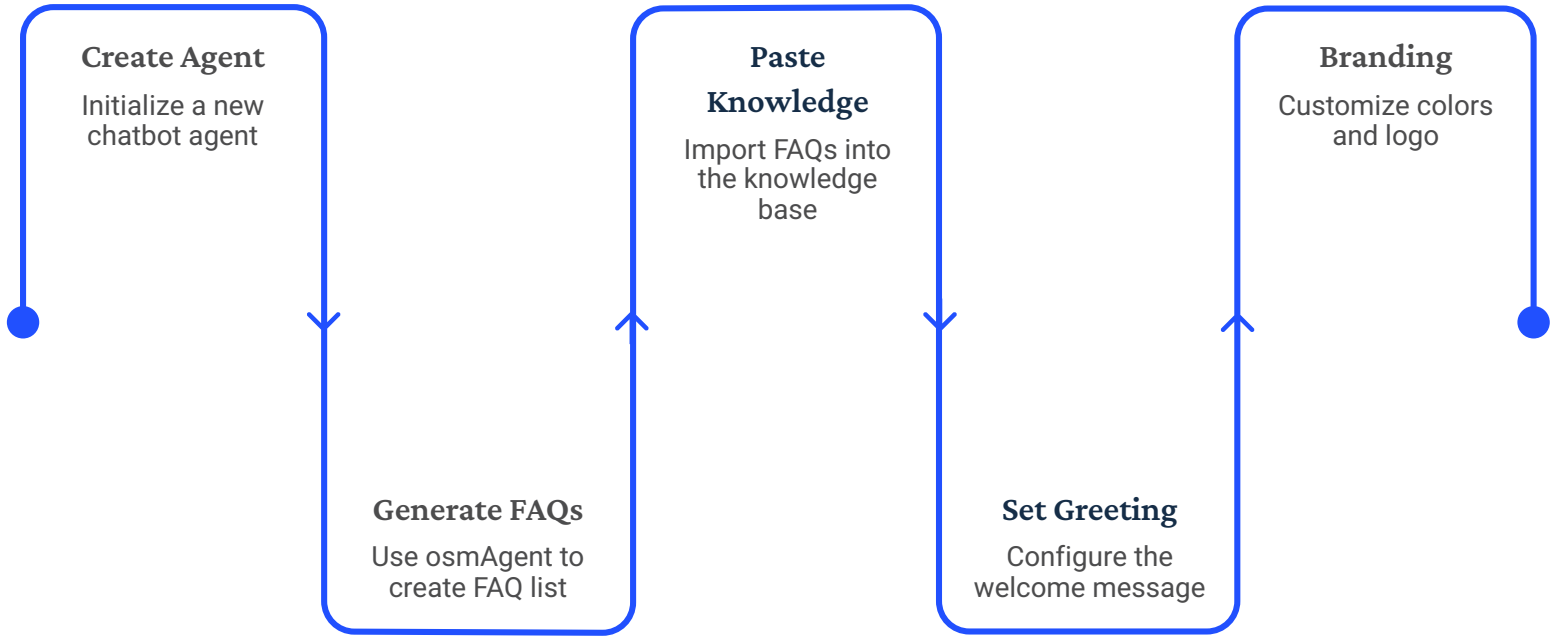
An AI chatbot answers every inquiry — midnight, Sunday, holidays — with zero additional cost or staffing.

ⓘ A chatbot does not replace your team. It handles the first conversation so your team only handles the warm, ready-to-buy customers.

DEMO: Watch Me Deploy a Chatbot in 8 Minutes

▷ INSTRUCTOR LIVE DEMO

Follow along as the instructor builds a fully functional chatbot for **PawPalace** — a premium pet grooming service — from scratch. Every step is repeatable for your own brand.



Each step takes under 90 seconds. By step 6, the chatbot is live on a real website and answering questions about services, pricing, and bookings — with zero coding required.

The Magic Prompt: Generating Your FAQ Bank

Before building the chatbot, you need content. Use osmAgent to generate a complete, professional FAQ bank in under 60 seconds. Copy this prompt exactly — word for word.

Step 2 of the Demo — Run this in osmAgent first, then paste the output into osmTalk's knowledge base.

> "Generate 15 frequently asked questions with detailed answers for **PawPalace**, a premium pet grooming service. Cover: services offered, pricing for all 5 services, booking process, operating hours, service areas, payment methods, refund policy, how long each service takes, home visit availability, and 5 pet-grooming-specific questions."

This single prompt produces a complete knowledge base. The chatbot will draw from these answers every time a customer asks a question — day or night.

YOUR TURN — Deploy Your Chatbot

⏱️ 15 MINUTES | YOU BUILD

You have 15 minutes. Follow each step precisely. Do not skip ahead. Every step has a time allocation — stick to it.

1	**Create Your Agent — 2 min** Open **app.osmtalk.com** → Click **Create New Agent** → Name it: *"[Your Brand Name] Assistant"*
2	**Generate FAQs — 3 min** Switch to osmAgent tab → Use the prompt template on the next slide → Copy the entire output
3	**Build Knowledge Base — 4 min** Return to osmTalk → Paste FAQs + your services list + business description from Module 2
4	**Customize Widget — 3 min** Set brand color, upload logo from Module 3, add greeting + after-hours message
5	**Embed and Test — 3 min** Copy embed code → Add to website via osmAgent → Visit site and click the chat widget to confirm it works

Your Exact FAQ Generation Prompt

Switch to your **osmAgent tab**. Type or paste the following prompt exactly, replacing the bracketed placeholders with your own details. Do not paraphrase — the specificity drives quality output.

> "Generate 15 frequently asked questions with detailed answers for **[YOUR BRAND NAME]**, a **[YOUR VENTURE TYPE]** business. Cover: what services you offer, pricing for all services, how to book or order, working hours, location or service area, payment methods accepted, refund or cancellation policy, how long each service takes, and 5 questions specific to **[YOUR INDUSTRY]**."

Copy the *entire* output. Then paste it directly into osmTalk's knowledge base field. Also add your services list and business description from Module 2 to the same field.

Setting Up Your Widget — The Brand Details

Your chatbot must feel like a natural extension of your brand — not a generic popup. Complete all four fields before moving to embed and test.

🎨 Widget Color

Use your primary brand color from Module 3. This keeps the chatbot visually consistent with your site.

🖼️ Logo Upload

Upload the same logo you placed on your website in Module 3. Reinforce brand recognition from the first message.

👋 Greeting Message

"Hi! Welcome to [Brand Name]. I can help with [service categories]. How can I help you today?"

🌙 After-Hours Message

"Thanks for reaching out! I can still answer questions anytime. For urgent matters, call [phone] or WhatsApp [number]."

Test Your Bot — 4 Questions Every Bot Must Pass

Once embedded, open your website and click the chat widget. Run all four tests before declaring your bot ready. If any answer is wrong, fix the knowledge base — do not move on.

"What services do you offer?"

The bot must list your core services clearly and accurately. If it's vague or wrong, your FAQ coverage is incomplete.

"How much does [main service] cost?"

Pricing must be exact. A bot that gets pricing wrong destroys trust instantly. Verify against your Module 2 pricing list.

"I want to book an appointment."

The bot must guide the customer toward a booking action — link, WhatsApp, phone, or form. No dead ends.

"What is the meaning of life?"

Test graceful failure. The bot should politely redirect — never confuse or crash on an out-of-scope question.

REVIEW — Quick Grade Your Bot

☆ 5-MINUTE GROUP REVIEW

The instructor will chat with 1–2 participants' bots live on the projector, testing edge cases in real time. While that happens, score yourself honestly on the rubric below.

Evaluation Criteria	Your Score	Max Score
Bot greets naturally and on-brand	___	5
Answers service questions accurately	___	5
Handles unknown questions gracefully	___	5
Brand voice is consistent throughout	___	5
Module 5 Total	**___**	**20**

ⓘ Score of 16–20: Bot is production-ready. 10–15: Improve your knowledge base content. Below 10: See the instructor before lunch.

MILESTONE — Look at What You Built This Morning

It is **1:00 PM**. In just **3 hours**, you have built more than most funded startups accomplish in months.

✅ Venture Idea

A validated business concept with a clear target customer

✅ Brand Identity

Name, logo, colors, and voice — consistent across all channels

✅ Live Website

A real, publicly accessible website with your offerings and story

✅ AI Chatbot

An always-on AI receptionist selling and answering questions 24/7

Most funded startups with 5-person teams do not reach this in 3 months. **You did it in one morning.**

LUNCH BREAK — 1:00 PM to 2:00 PM

⏱️ 1 HOUR

PROGRESS: 4 OF 8 MODULES COMPLETE

This is not just a meal — it is a live field test. Use lunch to stress-test each other's work and build connections.

Scan the QR Code

Access the **Venture Showcase Gallery** — a live directory of every website built today. Explore your peers' ventures.

Chat with Each Other's Bots

Try to break them. Ask weird questions. Probe pricing. Test edge cases. Good feedback makes everyone stronger.

Reconvene at 2:00 PM Sharp

The afternoon is where it gets **wild**. Do not be late. Four more modules await — and the stakes get higher.
