Module 2: Find Your Million-Dollar Idea

Time: 10:00 – 10:45 AM | **Demo:** 15 min | **You Build:** 20 min | **We Review:** 10 min

MODULE 2 OF DAY 1

What We're Doing in This Module

By the end of the next 45 minutes, every person in this room will have picked a venture idea **and validated it with AI**. No vague notions — a concrete, structured blueprint ready to build on.

🎯 Goal

Pick a venture idea and validate it with AI in under 20 minutes.

📄 Deliverable

A complete **Venture Blueprint** — business description, target customer, 5 services with pricing, revenue model, and competitive analysis.

✅ End State

You know **exactly** what you are building for the rest of the day. Zero ambiguity.

The Agent-Creatable Venture Test

Not every business idea works with AI agents. Before you invest time building, run your idea through this **5-Point Framework**. You must score **4 out of 5** to proceed.

1	**Digital Delivery** Core service can be delivered or fully orchestrated digitally.
2	**Digital Acquisition** Customers find you via website, chat, or phone calls — no foot traffic required.
3	**Online Payments** You can collect money via UPI, payment links, or online transfer.
4	**AI Support** Customer support can be automated via text chatbot and voice agent.
5	**Lean Operations** Day-to-day ops run with AI agents and minimal human oversight.

5-Point Test in Action: A Real Example

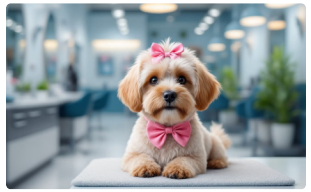
Let's score **"Premium Home-Cooked Meal Delivery in Hyderabad"** against every criterion — this is exactly how you should evaluate your own idea.

#	Criterion	How it applies	Score	Status
1	Digital Delivery	Food is physical, but ordering, menu browsing, and scheduling are all digital.	1	✅ YES
2	Digital Acquisition	Website + chatbot + phone orders handle all customer intake.	1	✅ YES
3	Online Payments	UPI payment links make collection seamless and instant.	1	✅ YES
4	AI Support	Chatbot handles order status, menu questions, and complaints automatically.	1	✅ YES
5	Lean Ops	AI manages orders, scheduling, and comms. Humans only cook and deliver.	1	✅ YES

Final Score: 5/5. This idea is fully agent-creatable. Minimum required: 4 out of 5.

Real-World Example: AI Generates Business Names

osmAgent doesn't just validate ideas — it generates a full slate of brand name options in seconds. Here's what it produced for three different ventures. Notice the variety in tone, memorability, and market positioning.



🐾 Pet Grooming Service

Generated: PawPalace, FurFresh, GroomBuddy, PetGlow, WagWash, Snip & Wag, CoatCraft, BarkBright, TailTidy

Best Pick: "PawPalace" — memorable, visual, premium feel, .com available.

📚 Online Tutoring Academy

Generated: BrainSpark, LearnLane, TutorNest, AceMind, ClassPilot, SkillForge, MentorMile, StudyHive, PrepWise, ExamEdge

Best Pick: "BrainSpark" — energetic, education-focused, works in English and Hindi.

🏠 Home Services Marketplace

Generated: FixItNow, HomeHero, ServiceSnap, TaskTiger, QuickFix Pro, HouseCall, HandyHub, RepairRaja, DoorStep Pro, ServeEasy

Best Pick: "FixItNow" — action-oriented, clear purpose, urgent feel.

Venture Idea Gallery — Purely Online

Choose any idea below as your starting point, or bring your own. Every idea here has been pre-screened as agent-creatable. Remember: it must score **4 out of 5** on the test.

Ideas 1–7

1. AI Tutoring Academy — any subject, any exam prep
2. Virtual Fitness & Nutrition Coaching
3. Online Legal Consultation Service
4. Digital Marketing Agency for SMBs
5. AI Travel Planning Concierge
6. Resume & Career Coaching
7. Virtual Bookkeeping & Accounting

Ideas 8–14

1. Content & Copywriting Agency
2. Language Translation Service
3. E-commerce Niche Store (curated products)
4. SaaS Micro-Tool (invoice/proposal builder)
5. Online Therapy/Counseling Matching
6. Stock Market Research & Alerts
7. Freelancer Staffing Agency

Venture Idea Gallery — Online + Offline

These ideas blend physical delivery with AI-powered digital infrastructure. All pass the 5-point test with 4+ scores. The human team handles the physical; AI handles everything else.

🏠 Home & Property

- Home Services Marketplace (plumbing, electrical, cleaning)
- Real Estate Brokerage / Property Management

❤️ Health & Wellness

- Health Clinic / Diagnostic Center
- Pharmacy Delivery & Consultation
- Pet Care Services (grooming, boarding, vet)

🍽️ Food & Events

- Restaurant / Cloud Kitchen
- Catering & Event Management

🎓 Services & Education

- Beauty Salon / Spa Booking
- Auto Repair Shop
- Driving School
- Coaching Institute

25+ ideas total. Or bring your own. The only requirement: it must pass the 5-point agent-creatable test.

DEMO: Watch Me Build a Venture Blueprint

INSTRUCTOR ACTION: Pick a participant's idea. Open osmAgent. Type the prompt live on the projected screen. Show the output streaming in real time. Point out each section as it appears.

Step 1 — Primary Prompt (type this live):

"I want to start a premium pet grooming service in Bangalore targeting pet parents who treat their dogs and cats like family. Help me create:
(1) A one-paragraph business description
(2) Target customer profile with demographics and pain points
(3) Top 5 services with pricing in INR
(4) Revenue model
(5) Why this is perfect for AI agent automation."

Step 2 — Follow-Up Validation Prompt:

"For this pet grooming business:
(1) Top 5 competitors in Bangalore?
(2) Estimated market size?
(3) 3 unique differentiators?
(4) Biggest risk and mitigation?"

Show osmAgent's output streaming on screen. Point out each numbered section as it appears. Narrate what you observe — don't skip this step.

YOUR TURN — Step 1: Pick Your Idea

⏱️ 5 MINUTES

This is the most important decision of the module. Don't overthink it — you can always refine later. The AI will help you pressure-test any idea in seconds.

1 Browse the Idea Gallery

Open your workbook to pages 3–4. Review the full list of 25+ ideas, or use a venture concept you already have in mind.

2 Write One Sentence

In your workbook, complete this sentence: "**I am building ___ for ___ because ___.**" Keep it specific — name the audience and the problem.

3 Run the 5-Point Test

Score your idea against all five criteria. You need **4 out of 5** to move forward. If you score 3 or below, pivot to a different idea now.

YOUR TURN — Step 2: Generate Your Blueprint

⏱️ 10 MINUTES

Open osmAgent on your laptop. Copy the exact prompt below, fill in your details, and paste it in. Do not paraphrase — precision in the prompt produces precision in the output.

> "I want to start a [YOUR IDEA] business targeting [YOUR AUDIENCE] in India. Help me create:
> (1) A one-paragraph business description
> (2) Target customer profile with demographics and pain points
> (3) Top 5 services or products with suggested pricing in INR
> (4) Revenue model
> (5) Why this business is perfect for AI agent automation."

→ Replace the brackets

Fill in [YOUR IDEA] and [YOUR AUDIENCE] with your specific details before submitting. Generic inputs produce generic outputs.

→ Read the full output

Don't just skim. Review every section carefully. If something feels off, refine it with a follow-up prompt before moving to Step 3.

→ Save everything

Copy the output into your workbook or a notes app. You will build on this blueprint for the rest of the day.

YOUR TURN — Step 3: Validate Your Blueprint

⏱️ 5 MINUTES

After generating your initial blueprint, run this second prompt to stress-test it against the real market. This is where most CXOs gain the most insight — don't skip it.

"For my [BUSINESS] business:
(1) Who are the top 5 competitors in India?
(2) What is the estimated market size?
(3) Suggest 3 unique differentiators that set me apart.
(4) What is the biggest risk and how do I mitigate it?"

⚠️ **Instructor:** Walk around the room during this step. If anyone is stuck, help them fill in the prompt brackets. Do not let participants sit idle.

✅ What to look for

Competitors you hadn't considered. A market size that confirms real demand. Differentiators that feel authentic to you.

⚠️ Red flag

If AI cannot identify a clear market or any competitors, your idea may be too niche or unclear. Reframe and try again.

REVIEW — Self-Grade Your Venture Blueprint

⏱️ 10 MINUTES

INSTRUCTOR: Pull up 2 participants' blueprints on the projected screen. Give specific praise on one element and one concrete improvement suggestion for each. Keep it positive and fast-paced.

Open your workbook. Score yourself honestly — this is your baseline, not a judgment. You will improve every score before the day ends.

Evaluation Criterion	Your Score	Max Score
Clear problem being solved	___	5
Defined target customer (demographics + pain points)	___	5
Viable revenue model with pricing	___	5
Fully agent-creatable (scored 4+ on the test)	___	5
Competitive differentiation (3 clear differentiators)	___	5
Module 2 Total	**___**	**25**

Key Takeaway

> You don't need a perfect idea. You need a **good-enough idea** that passes the agent-creatable test. The AI handles validation and refinement. You bring domain knowledge and customer empathy.

You Bring

Domain expertise, customer relationships, and the judgment to recognize a real problem worth solving.

AI Brings

Rapid validation, market research, competitive analysis, pricing benchmarks, and differentiation strategy — in minutes.

Together

A venture blueprint that would have taken a consultant weeks to produce — built in 20 minutes.

Up Next: Module 3 — Build Your Brand

You have your idea. You have your blueprint. Now it's time to give it an identity the market will remember.

1

Name

Generate 10 brand name options and select the strongest one with AI guidance.

2

Logo

Create a professional logo concept using osmAgent's visual design tools.

3

Voice & Tagline

Define your brand tone, personality, and a tagline that resonates with your target customer.

Action: Open your workbook to **Module 3** now. Have osmAgent open on your laptop. We begin in 2 minutes.
